Scorecard for Forecast 2014

Low Interest Rates Through 2014

"The preponderance of transits in 2014 involving Jupiter, which indicates easing, not tightening, will continue. These studies indicate that the Fed will likely continue its low interest rate and accommodative monetary policies through 2014."

The Fed indeed kept rates at unprecedented, multi-year lows with its policies in place to continue with this for well into 2015.

Strong U.S. Dollar

"A normal corrective decline in a bull market would be 78.40 +/- 1.50. Traders may thus look to buy as long as the U.S. Dollar index holds above this support zone."

On May 8, 2014, the U.S. Dollar made its yearly low of 78.90. The Dollar then started an impressive rally to 86.74 by early October.

Continuing Scandals in the USA

"If the first half of the Uranus-Pluto square is any indication of what is to come, than we can anticipate more revelations involving more secrets and cover-ups in the next year. In fact, these revelations may reach a crescendo within weeks of April 20-55, 2014."

The Veterans Administration scandal was revealed within days of April 20-22, followed by the uproar over the swap of 5 Taliban prisoners for one army sergeant (who may have deserted his unit).

Possibility of War

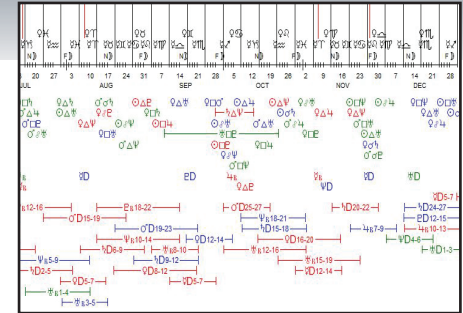

"Mars turning retrograde (March 1-May 20) nearby to Saturn also turning retrograde (March 2-July 20), is particularly worrisome, for this is another warlike combination. Unfortunately, the United States is right in the middle of this quagmire."

This coincided with Russia's annexation of Crimea, a new Cold War between the USA, Western Europe, and Russia. It also signaled the rise of ISIS.

Time to Prepare for 2015

With these Excellent Tools and Forecasting Reports

The 2015 Calendar graph has been completely updated to reflect the level 1, 2 and 3 signatures from ***The Ultimate Book on Stock Market Timing Vol. 3: Geocosmic Correlations to Trading Cycles***

Originally created by Raymond Merriman and Neil F. Michelsen, this 11" x 34" calendar graph contains all the Level 1, 2, and 3 geocosmic signatures that are in effect in the year 2015. Each level is color-coded according to the principles outlined in ***The Ultimate Book on Stock Market Timing, Vol. 3: Geocosmic Correlations to Trading Cycles***, by Raymond Merriman, for easy visual identification of major probable reversals in most financial markets. In addition, the attractive calendar graph also provides post-retrograde and direct time bands for probable cycle troughs and crests in the Gold and Silver market, as outlined in ***The Gold Book: Geocosmic Correlations to Gold Price Cycles***. Also listed are dates for new and full moons, and ingress dates for heliocentric Mercury and Venus (which also coincide with short-term reversals in many financial markets). The graph comes with a simple one-page instruction sheet, and will be a reference tool you will use for the entire year!

8 1/2" x 34" – WAS \$250.00 NOW \$125.00

L I S T S

List of MMA's Level One, Two, and Three Signatures for 2015:

Chronological listing of 2015's Level 1, 2, and 3 signatures in effect for U.S. stocks and Gold market, from the FAR program, as reported also in "The Ultimate Book on Stock Market Timing Volume 3: Geocosmic Correlations to Trading Cycles," and "The Gold Book: Geocosmic Correlations to Gold Price Cycles."

These lists also provide ingresses of planets into signs. Also, additional lists are included for NYSE and T-Bond reversals, based on transits to both the NYSE and Federal Reserve Board charts.

In all, there are four lists combined in this package, to help the trader/analyst identify when important reversals are likely to occur in world stock indices, T-Bonds, and Gold. These lists work very well in combination with the Calendar Graph for 2015.

The cost for the entire set of lists is \$100.00

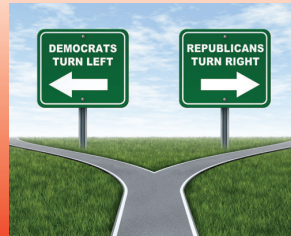

America at the Crossroads:

Will it Survive, Perish, or Transform?

"America is in trouble....It is in danger of losing its identity, perhaps many of its treasured liberties, based on over 200 years of being the most exceptional experiment in democracy and capitalism the world has ever known." -Raymond Merriman

This powerful presentation examines the Declaration of Independence as the basis for the chart of the United States. It deciphers the meaning of the current transits and progressions to this chart, the current role of the USA president, his transits and progressions, and Congress. It unveils the transformation occurring in the USA under the 2008-2015 Cardinal Climax, and where the nation is headed, pending choices and reactions to events taking place right now. A pdf file of the PowerPoint slides presented during the lecture is included with your purchase.

Available Formats:

Audio CD: \$35.00 plus postage
MP3 Download: \$35.00

A Cyclical and Geocosmic Analysis of Gold and the USA Stock Market

"Both Gold and Stocks have yet to complete their long-term cycle trough and/or crest during Uranus square Pluto aspect. Both are due.... Gold is now at another critical point, as the 34- and 17-month cycle troughs are also coming due..." -Raymond Merriman

This presentation, given on September 28, 2014, examines both Gold and the USA stock market. Each makes historical tops and lows at rhythmic cyclical points and within long-term planetary aspects to one another. This presentation reviews these studies, their historical correlations to one another, and what they say about the future direction of Gold and the U.S. stock market over the next two years. A pdf file of the PowerPoint slides presented during the lecture is included with your purchase.

Available Formats:

Audio CD: \$35.00 plus postage
MP3 Download: \$35.00

NEW BOOK COMING OUT IN 2015!!!

"The Sun, The Moon, and the Gold Market: Solar-Lunar Correlations in Gold Prices" by Raymond Merriman. Projected release date is October 2015.

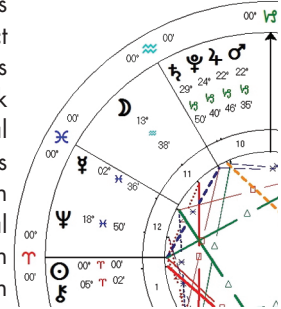

Retail price: \$125.00 . . . Pre-Publication Special is \$95.00. Order Now and Save Big Bucks!

Forecast 2015 Book

Written by Raymond Merriman since 1976

The Cardinal Climax (2008-2015) is nearing its end. The last major aspect between Uranus and Pluto culminates March 16-17, 2015. No other book has prepared readers for the Cardinal Climax as well as Raymond Merriman's annual Forecast Book. Merriman began alerting readers in 1994 that an economic and political transformation was coming in 2008; the impact of which had not been seen since the years of the Great Depression leading up to World War II. So what's next?

GEOCOSMICS: THE NEXT GENERATION

We now turn our attention to 2020, when Jupiter, Saturn, and Pluto converge in Capricorn, reasserting the renaissance in worldwide communications, technology, and drive for world peace that began in 1988-1993, but was interrupted in 2001. How will this affect world finances and the War on Terrorism? How can you prepare for these next global challenges and opportunities? Just as prior Forecast Books prepared readers for the Cardinal Climax, the 2015 Forecast Book will prepare you for the next cosmic configuration, and the true ending to the Cardinal Climax.

Integrating cycle studies and geocosmic factors, Raymond Merriman's annual Forecast Book includes special sections pertaining to interest rates, stock markets, precious metals, currencies, crude oil, weather, and grain markets. It also features a list of the highly accurate three-star geocosmic critical reversal dates for each of the financial markets analyzed in 2015.

This type of market timing information is invaluable to traders of financial markets!

Available on December 15, 2014

Cost \$55.00 plus postage
(\$11.00 USA, \$21.00 Canada,
\$25.00 Overseas - no postage for eBook
format) Approximately 150-180 pages,
8.5" x 11", perfect bound, softcover

WHAT'S NEXT?

Be sure to read Raymond Merriman's *Forecast 2015 Book* for more information on the next major challenges facing humanity in 2015, and how YOU can be prepared.

“Identifying the Next Long-Term Investment Opportunities” An MMA Special Retreat for Investors

MMA will host a special retreat and we are inviting subscribers of any MMA subscription reports, to join us at an attractive location to be determined (such as Napa Valley, California, Telluride, Colorado, or Florence, Italy) for a four-day event August 27-30, 2015.

The focus of the retreat will be: “Identifying the Next Long-Term Investment Opportunities.” We will be providing valuable original insights into the financial opportunities and dangers that can affect your personal wealth in the next 1-5 years.

An overview of long-term financial market cycles that have just begun, or are due to begin shortly, will be led by Raymond A. Merriman. These discussions involve an examination of specific market securities, indices, commodities, and ETF's that could be used to best capture these longer-term investment opportunities. This could be of great value to those looking to enhance their personal portfolios. Aiding these discussions will be specially selected MMA Apprentices, who will be sharing their valuable original research studies on specifically assigned markets.

Attendees will be invited to participate in these discussions and ask questions of the most interest to their personal financial needs, if they wish. Portfolio managers and/or asset managers who use our methods of analysis will be present as well to assist attendees in portfolio structuring.

The cost to participate in this special retreat is \$4000.00. Space will be limited to 12 attendees, in addition to MMA apprentices and staff.

If you are a subscriber to any MMA Report and you are interested in being a part of this event, please contact MMA directly at 1-248-626-3034 at your earliest convenience.

MMA REPORTS

MMA ADVISORY SERVICES FOR TRADERS

M.M.A. DAILY MARKET ANALYSIS

(by E-Mail only, sent every night after market close, for the next day)

2-3 page daily comments and analysis and forecasts for the next day's market activity in the DJIA, S&P, NASDAQ, Euro, T-Notes, Crude Oil, Gold, and Silver futures. List of support/resistance areas, trend indicator points, geocosmic and lunar reversal points in effect, cycles commentary, and recommendations. The MMA Weekly Market Analysis is also included with this subscription.

\$3600.00/year, \$360.00/mo.

M.M.A. WEEKLY MARKET ANALYSIS

(by E-Mail only, sent every weekend)

9-12 page weekly comments and analysis and forecasts for next week's market activity in the DJIA, S&P, NASDAQ, Euro cash, Euro futures, Dollar/Yen cash, Yen futures, Swiss Franc futures, T-Notes, Soybeans, Crude Oil, Gold, and Silver futures. List of support/resistance areas, trend indicator points, geocosmic and lunar reversal points for the week, cycles phasing, and recommendations. This is our most popular service for active traders.

\$1650.00/year, \$495.00/3 mo.

SPECIAL SECTOR WEEKLY REPORTS - BY POPULAR DEMAND!!!

Each of the weekly email reports listed below is now available for **\$875.00/year**, or **\$275.00/3 months**. For those who specialize in certain sectors of the weekly markets analyzed.

1. M.M.A. WEEKLY GOLD AND SILVER ANALYSIS

3-5 page comments, analysis, and forecasts for next week's market activity in the Gold and Silver nearby futures. List of support/resistance areas, trend indicator points, geocosmic and lunar reversal points for the week, cycles phasing, and strategies for position traders and aggressive short term traders for the week.

2. M.M.A. WEEKLY STOCK INDICES ANALYSIS

3-5 page comments, analysis, and forecasts for next week's market activity in the DJIA cash index, and the e-mini S&P and NASDAQ 100 nearby futures. Many traders use these also for ETFs. List of support/resistance areas, trend indicator points, geocosmic and lunar reversal points for the week, cycles phasing, and strategies for position traders and aggressive short term traders for the week.

3. M.M.A. WEEKLY CURRENCIES ANALYSIS

3-5 page comments, analysis, and forecasts for next week's market activity in the cash Euro currency, Dollar-Yen, and Euro-Yen markets, as well as nearby futures in Swiss Franc, Euro, and Japanese Yen. List of support/resistance areas, trend indicator points, geocosmic and lunar reversal points for the week, cycles phasing, and strategies for position traders and aggressive short term traders for the week.

4. NEW!!! MMA WEEKLY TREASURY NOTES, SOYBEANS, AND CRUDE OIL ANALYSIS

3-5 pages of analysis on 10-year U.S. Treasury Notes, Soybeans and Crude Oil in one weekly report. Each weekly report identifies weekly support-resistance, price targets for rallies and declines, labeling of the primary cycle and its phases, comments on outlook, specific strategies and recommendations and stop-loss points for both position and aggressive traders.

WEEKLY UPDATE OF JAPANESE NIKKEI

(sent out every Friday afternoon for the next week).

2-3 page in-depth analysis and forecasts for next week's Japanese Nikkei stock market. Covers cycles phasing, geocosmic and lunar signatures and potential reversals implied via each for the next week, price objectives and patterns, and technical studies denoting support and resistance areas and trend indicator points in effect for the next week. Highly accurate!

\$1500.00/yr; \$450.00/3 mo.

GALACTIC TRADER is designed to meet the needs of traders and researchers of all levels of planetary knowledge, performing basic planetary Harmonic Price Analysis on any market in any time frame. See precise planetary position to price relationships as they unfold.

Tools Include:

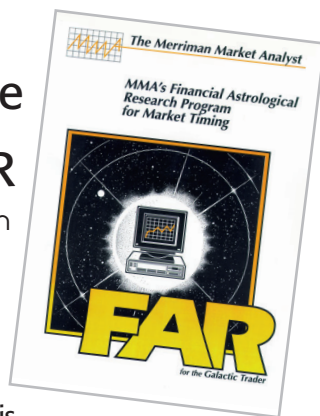

- Planetary Lines
- Aspect Research
- Ephemeris
- Live Planetary Clock
- Natal Chart List
- Expanded Universal Clock
- **Now with Asteroids and Transneptunians**

F.A.R. for the GALACTIC TRADER

by Raymond Merriman

F.A.R. (Financial Astrological Research) module allows you to design and conduct quantitative analysis studies on the relationships between market prices and geocosmic signatures. It presents results in a table format and attractive bar graphs or pie charts. This incredible software program has all the features and customer support qualities that traders and market analysts expect from a first-class charting system. Price charts can be created from all the well-known data vendors.

FAR for the Galactic Trader – End of Day: **\$1890.00**
FAR for the Galactic Trader – Real Time: **\$2290.00**
FAR only: **\$995.00** (add FAR to any existing or rental Galactic Trader software)

COMING SOON FROM MMTA

The International Markets and Deep Cycles Research Report

Graduates of the Merriman Market Timing Academy (MMTA) are continuing their research in select markets using established MMA methodologies combined with new in-depth cycle studies and long-term geocosmic patterns.

These select members of the MMTA Research Team will begin publishing the new MMTA INTERNATIONAL DEEP CYCLES REPORT in December 2014. These monthly reports will cover several international financial and commodity markets not covered in the MMA Cycles report. Like the MMA Cycles Report, this new International Deep Cycles Report will include “Special Long-Term” reports approximately every 2-3 issues, in addition to consistent monthly analysis (with trading strategies) for each market to be covered.

MMA will be distributing the first three reports free to all current MMA paid subscribers, as a special expression of thanks. There are indeed benefits to being an MMA subscriber, and this is one!

MMTA plans to cover at least 6 of these markets in-depth for your portfolio, depending on the level of interest expressed by subscribers:

Commodities (Foods): Corn, Wheat, Soybeans, Coffee and Sugar
Currencies: GBP-British Pound and AUD-Australian Dollar, and perhaps Canadian Dollar
Indexes: IWM-Russell 2000, CNX-India Nifty 50, and ASX-the Australian All Ordinaries

Don't miss this opportunity for new trading horizons – Sign up for a MMA Cycles subscription report today to receive your initial three copies of this new MMTA market analysis and forecasting product free! Or, subscribe separately now via the enclosed order form.

MMA Subscribers!

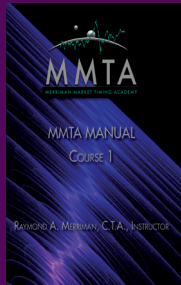

New Market Research with New Trading Opportunities

2015 - The First Three Months FREE

Two Great Programs Combine to Give Traders the Cutting Edge in Astro Market Timing!

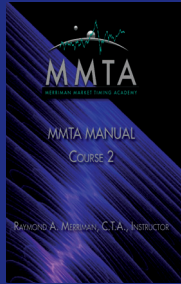

FAR works with Galactic Trader to give you the perfect blend of advanced Windows-based technology, sophisticated market timing tools, and the popular technical studies.

MMTA Course 1: Cycles and Patterns in Financial Markets

This course begins with the terminology used in cycle studies — a principal market timing tool of the MMA methodology. Instruction covers the various types of chart patterns and “phases” that are present in all market cycles. Various technical studies are used to confirm the completion of the crests and troughs of these long-term, intermediate-term, and short-term cycles. Students will be introduced to cycles of several financial markets, such as stock indices, precious metals, currencies, treasuries, grains, and crude oil, for both investment and trading purposes. Students will be trained in the different periodicities of each market, and how to find the appropriate cycles for each market.

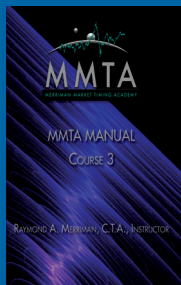

Cost of this course for Open Entry/Open Exit students: \$3000.00.

MMTA Course 2: Geocosmic Correlations to Long-Term Market Cycles

The second course builds on the first with a review of long-term cycles in various financial markets and their phases. Within that framework, the correlation of these cycles and phases with long-term planetary aspect signatures is discussed at length, with an approach towards long-term investing. Special emphasis is given to those time bands containing aspects between Saturn, Uranus, Neptune, and Pluto, as well as their sign placements correlating with long-term cycle crests and troughs. The Moon’s North Node is also covered, particularly with relations to long-term economic and stock market cycles. Students are instructed in the percentage of price reversals that typically occur after the completion of these cycles. Within long-term cycles (those over 4-year durations) students also learn to identify the time bands of intermediate cycles (those that last over 40 weeks). Special emphasis will be given to stock indices and precious metals for investors.

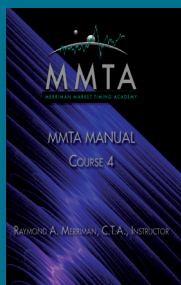

Cost of this course for Open Entry/Open Exit students: \$2750.00.

MMTA Course 3: Geocosmic Correlations to Primary and Trading Cycles in Financial Markets

This course will review “trading cycles” in various financial markets. Specifically it will focus on the primary cycle and its phases, and the planetary signatures that correlate with each for market timing and position trading purposes. It will instruct on how to calculate and use a critical reversal date to identify short-term time bands that have a high probability of correlating with a reversal in any market. This course will outline the basis for Level 1, 2 and 3 planetary signatures - how they are determined and used in the MMTA methodology as powerful market timing tools.

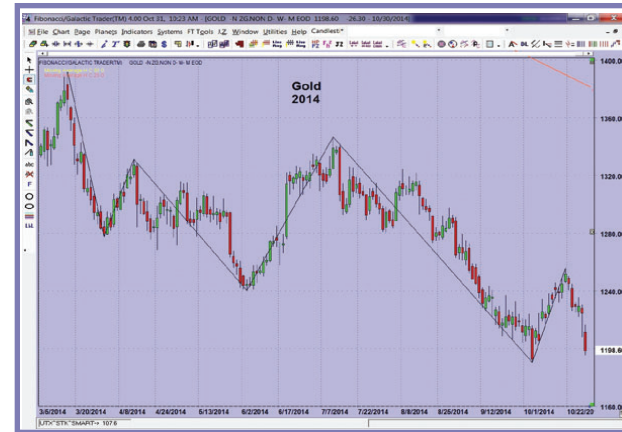

Cost of this course for Open Entry/Open Exit students: \$2750.00.

MMTA Course 4: Solar-Lunar Correlations to Short-Term Reversals in Financial Markets

This course will instruct on various solar-lunar combinations that have high correlations to 4% or greater reversals for 1-4 days in stock indices and the Silver market. Students will be instructed on how to identify a proper setup for applying a buy or sell point when these solar-lunar cycles indicate a reversal is likely to occur. Instruction will also be given on identifying high probability turn times within the trading days based on planetary movements over the horizon and meridian of the city in which the exchange for a particular market is being traded on.

Cost of this course for Open Entry/Open Exit students: \$2750.00.

Filtered Wave Research can be used to identify which geocosmic factors have an usually high (or low) rate of occurrence to reversals in any given market.

This chart is an example of how FAR for the Galactic Trader uses filtered waves, indicating where 4% or greater moves began and ended.

Applications for short-term timing of Silver prices as well as T-Note and T-Bond prices are also included. And with Galactic Trader, technical studies can be applied to any chart. With the FAR program, you can create time bands for potential market turns. With the technical tools of Galactic Trader, you can confirm the market reversal. Using both FAR and Galactic Trader, you get a clear sense of the reversal’s trading potential.

The Ultimate Book On
Stock Market Timing - Volume 1
Cycles and Patterns In The Indexes

by Raymond A. Merriman

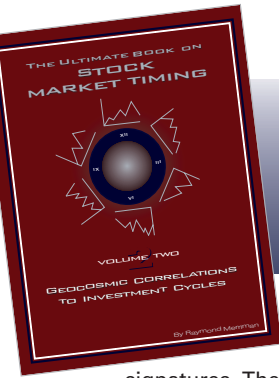

This, the first volume in the series, is about reversal probabilities in the US stock market, covering the entire history of the New York Stock Exchange (1789-1997) as well as the Japanese Nikkei Stock Index (1949-1997). It identifies 15 long and short-term recurring cycles, and the types of patterns which unfold in each. It clearly explains not only WHEN a market is likely to form an important crest or trough, but also HOW that cycle will most likely unfold. With this knowledge one knows where the market is, where it is headed, when it is likely to get there, and what it will do next.

248 pages, soft cover **\$95.00**

The Ultimate Book On
Stock Market Timing Volume 2
Geocosmic Correlations to
Investment Cycles

by Raymond A. Merriman

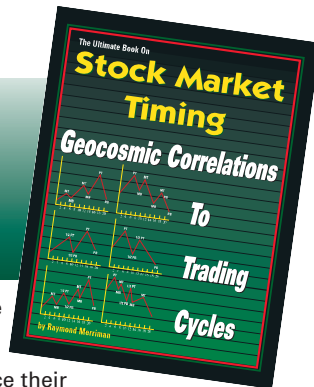

In this, the second volume of the series, Raymond Merriman examines all the 50-week and greater cycles in the history of the U.S. stock market, and their correlation to geocosmic signatures. The results are surprising – and phenomenal! With the information provided in Volumes 1 and 2, you will have perhaps the best guides available for anticipating when the most significant crests and troughs in the U.S. stock market will unfold. And if you are not completely satisfied with these books, there is a money-back guarantee! Just return in good condition, within 30 days.

299 pages, soft cover **\$125.00**

The Ultimate Book On
Stock Market Timing - Volume 3
Geocosmic Correlations to
Trading Cycles

by Raymond A. Merriman

This is the most comprehensive position trading reference book to date on the relationship of geocosmic signatures to reversals in U.S. stock indices. It is written for traders or analysts of U.S. stocks and stock indices that wish to enhance their ability to identify critical reversal zones far in advance. With this book, the reader will discover which are the most powerful and consistent geocosmic signatures to all the trading and greater cycles in the U.S. stock market. There is nothing like this book available today. This is a book that traders and market timers will refer to for many, many years!

448 pages, soft cover **\$150.00**

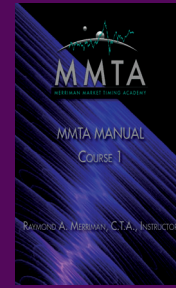

MMTA Course 5: Trading Plans – Integrating Market Timing Signals With Price

Courses from the first year of study were designed to assist the student with mastering the concepts of market timing studies (leading indicators or triggers), with special emphasis on Cycles and Geocosmics, including solar-lunar correlations to market reversals.

In this first course of the second year, we add the idea of “price” to our understanding of “time.” This course introduces students to price objective theories, support and resistance calculations, chart patterns and other technical studies. Students will be instructed in combining these coincident and confirming indicators with their market timing studies to better identify potential reversal zones and maximum trading opportunities in both short and long-term market cycles.

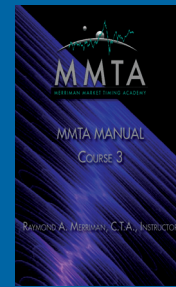

Cost of this course for Open Entry/Open Exit students: \$3600.00.

MMTA Course 6: Advanced Support-Resistance Calculations for Trading

This course moves the student into an understanding of the different strategies required for shorter-term aggressive trading, including counter-trend trading setups. Building on the knowledge gained from the analysis of longer-term market cycles and phases, the student now focuses on market moves lasting less than three weeks and as little as one to four days. Special emphasis is given to techniques for calculating daily/weekly support and resistance zones, determining trend analysis, and understanding charting parameters for neutral, bullish and bearish market patterns. Students are instructed in the integration of these methodologies to begin to develop market analysis and report writing skills.

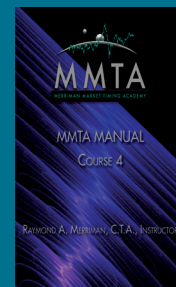

Cost of this course for Open Entry/Open Exit students: \$3900.00.

MMTA Course 7: Strategies – Putting It All Together

This course integrates studies from all previous courses and prepares the student to develop market analysis reports and create trading plans for personal use as investors and traders. Students are instructed in the methodology of combining market timing factors, trend analysis, chart structures, price objective theories and technical studies. Emphasis is given to developing a professional reporting style suitable to the needs of potential clients including investors, position traders and aggressive short-term traders.

Cost of this course for Open Entry/Open Exit students: \$3600.00

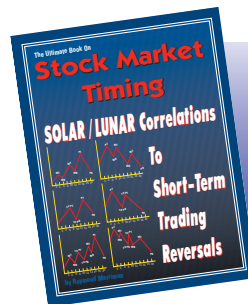

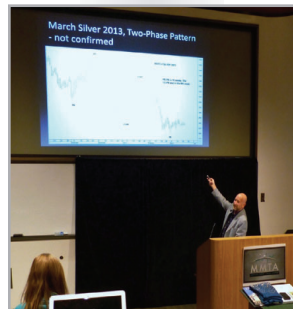

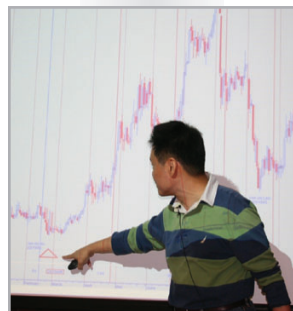

MMTA is the first and only in-depth online training course based on the principles of financial market timing as developed by Raymond A. Merriman, (CTA), as a result of over 30 years of research and professional trading experience. Much of the material used in these courses comes from Merriman's published books, including the five volume set titled "The Ultimate book on Stock Market Timing, Volumes 1- 5," as well as his "The Sun, the Moon and the Silver Market: Secrets of a Silver Trader."

Raymond A. Merriman taught these courses live over a two-year period (2013-2014). The program consists of 7 courses and 99 lessons. After each course is an extensive test, by which the student can evaluate his/her understanding of the material. Each course also contains several quizzes to enhance comprehension. Every course comes with a workbook, and students may view the online course as often as they wish.

There is nothing else like this course available today. If you wish to gain that extra edge that all traders seek, or if you wish to learn the steps on how to become a skilled market timer or financial market analyst specializing in market timing, then these courses will be of immense value.

The Ultimate Book On Stock Market Timing - Volume 4 SOLAR/LUNAR Correlations To Short-Term Trading Reversals

by Raymond A. Merriman

This is the most comprehensive analysis yet of all the faster-moving Sun-Moon combinations and their correspondence to price movements in stock indices available today. It examines 60 years of daily data on the Dow Jones Industrial Averages, and the past 16-18 years of daily data on the NASDAQ Composite and Japanese Nikkei stock indices. The probability of 4% or greater reversals is assigned to each Sun-Moon combination, which are usually in effect one, two, or sometimes three trading days per year. There are about 30 of these short-term periods that have a high probability for a reversal in effect every year. If you are a short-term trader of stock exchange futures, options, or the stock exchange traded indices on the AMEX, like the DIA, SPY, or QQQ, this is a book that can provide an extremely valuable market timing advantage.

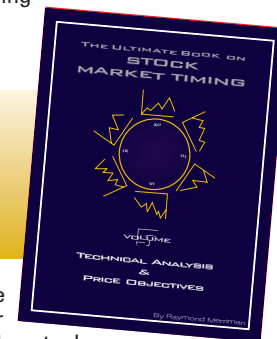

242 pages, soft cover **\$95.00**

The Ultimate Book On Stock Market Timing - Volume 5 Technical Analysis and Price Objectives

by Raymond A. Merriman

This is the last volume completing this 5-volume series on The Ultimate Book on Stock Market Timing. All four of the prior volumes focused on market timing: WHEN to buy or sell the stock market. This book now provides the final part, the missing link: At what PRICE to buy and sell. This book delves into the 300+ year charts of the US and British stock markets to examine the percentages of gains and declines in long-term cycles. It shows the importance of combining multiple time frames, or multiple cycle lengths, to establish an understanding of longer-term cycles using a variety of mathematical calculations based on market symmetry. It identifies the three basic chart patterns within all cycles, and how to forecast the time bands and price targets for the troughs and crests of the phases within each cycle.

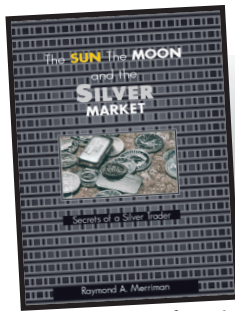

300 pages, soft cover **\$144.00**

It is the combination of knowing the right time and the right price that determines the degree of one's success in trading or investing. This five volume set covers all of these factors in the most comprehensive studies ever conducted utilizing geocosmic, cycles, pattern recognition, trend analysis, and technical analysis studies.

"The Ultimate Book on Stock Market Timing series is truly a life's work of grand proportion. Raymond Merriman has built the foundation upon which Financial Astrology can securely rest. Volumes 1-4 were more than a foundation, they were an edifice, and Volume 5: Technical Analysis and Price Objectives, is the pinnacle. Coupled with the timing strategies of the first 4 volumes, these volumes provide a complete trading methodology, brilliantly and logically presented, that any person who makes the time and the effort to understand, may trade profitably."

-Duke O'Neil, President, Capstone Capital Wealth Management, Boulder, CO

The Sun, the Moon, and the Silver Market Secrets of a Silver Trader

by Raymond A. Merriman

This second edition covers 25 years of daily price studies for correlations between the Sun and Moon signs of isolated highs and lows in COMEX Silver (1981-2006). This easy-to-reference study examines 4% reversals from isolated highs and lows, and identifies the solar-lunar combinations that have the highest (and lowest) correlations to such reversals. It also identifies correlations between Sun-Mercury and Sun-Venus signs for further support to high probability trades.

An exciting new section has been added that examines "Big Range Days" – those days in which Silver has a range of at least 3.5% of the value of the low of that day. This is a fabulous tool for those who wish to be day-traders of this volatile precious metal!

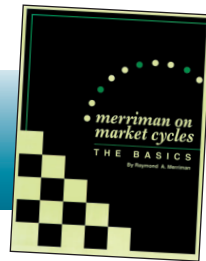

This book provides the maximum benefit that all traders seek: high probability trades with minimal market exposure. A great reference book for short-term traders (1-7 day positions).

208 pages, softcover

Merriman on Market Cycles: The Basics

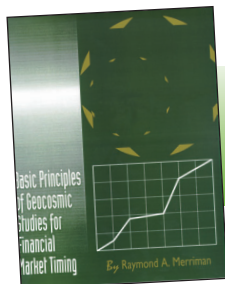

by Raymond A. Merriman

A comprehensive book that clearly explains the art of determining cycle lengths and recognizing patterns within those cycles. A book for those who want to improve their timing skills by integrating cycle analysis with technical studies. Includes listing of long-term and short-term cycles in U.S. and Japanese Stock Markets, Gold, Silver, T-Bonds, Interest Rates, Currencies, and Grain Markets.

61 pages, softcover

\$25.00

Basic Principles of Geocosmic Studies for Financial Market Timing

by Raymond A. Merriman

The perfect place to begin one's study of Financial Astrology. Geocosmic signatures, as described in this book, may be the most precise indicators available in the area of market timing. Created especially for those interested in financial market timing, but who have little knowledge of the field of astrology. Written in a simple, easy to understand style, this book will walk you clearly through each step of determining a "critical reversal date." It includes a section on the correlation of astrological signs and planets to various stock market sectors.

53 pages, softcover

\$15.95

The first live series of classes is over (2013-2014). It was a great success for the 21 students who rigorously completed all the course tests and finished the research assignments associated with each course. We feel there will be a demand for a second set of live courses (and beyond), and if so, there are currently two options for student participation.

OPEN ENTRY/OPEN EXIT: The first option allows students to take the program online at their own pace via recordings of the live presentation. This program is available for purchase at www.mmacycles.com, or www.merrimanmta.com. We estimate it may take up to two years to view all the lessons.

"... it's a must for the people who are craving to become a successful trader, investor, or analyst."
Nitin Bhandari

During that time, there is no requirement to take any tests or do homework assignments. It is purely for one's own knowledge. These online course attendees are considered "Open Entry/Open Exit" students (OE/OE). If they have questions about any part of any course, they may call MMA and an MMTA apprentice will be assigned to answer their inquiries. If an apprentice cannot answer the question, then it will be given to Raymond Merriman to answer. For the second option, when there are at least 12 people committed to a new series of MMTA live courses, the next two-year program will be organized. We anticipate offering a live program in late 2015.

ENROLLED STUDENTS: When the next live program begins, the OE/OE students will have the option of joining with enrolled students in the live courses, either by being physically present or via the live webcast of the new classes. There will be no extra fee for anyone who switches from "Open Entry/Open Exit" to "Enrolled Student." OE/OE students will become eligible to receive certification upon the successful completion of MMTA's academic requirements. These requirements include passing all exams at the end of each course and successfully executing research assignments between each course. Upon graduating, students will receive a diploma, recognizing their skills and achievements as an MMTA market timer. Select students may also be eligible to continue with graduate apprentice students.

If you are serious about becoming a financial market analyst, specializing in financial market timing, then MMTA is your gateway to that path. MMTA is the first and only intensive training in financial market timing available anywhere in the world. It is very innovative, very valuable, and very exciting.

"... it is not common to find a qualified person to help others advance; yet in this instance, we not only have an exceptionally knowledgeable and qualified person but also one who is willing, in fact eager, both to share his knowledge and mentor others to carry the torch he will be passing on." - Henry Canciglia

If you are interested in enrolling in the next live program of MMTA courses, please contact us and we will send you an information kit and application.

THE DVD ON BASIC PRINCIPLES OF GEOCOSMIC STUDIES FOR FINANCIAL MARKET TIMING: HOW TO READ AN EPHEMERIS FOR TRADERS!!!

The MMTA pre-training workshop on "How to Read an Ephemeris for Traders" was conducted on the weekend of September 15-16, 2012 by Raymond Merriman. It was an excellent course and the DVD production is exceptional too. The 8-set DVD of this 2-day workshop is now available and includes the workbook used in that course. If you are a trader, analyst, or student interested in enhancing your skills in market timing, this is a DVD you will find to be of great value.

In this DVD, you will learn: 1) how to read an ephemeris; 2) how to calculate aspects and planetary ingresses; 3) how to determine a critical reversal date; 4) the natural lunar rhythm for stocks and precious metals; 5) how to identify solar-lunar combinations, and 6) much more! This DVD covers all the topics needed in order to pass the entrance exam required for enrolling in the Merriman Market Timing Academy (MMTA). But the information is valuable on its own even for those who do not plan to enroll in the Academy.

"I really enjoyed attending the workshop on "How to read an ephemeris." I thought the content was presented in a simple and understandable format which made learning the subject much easier than I had anticipated." - S. R., Salt Lake City, UT

"I am somebody who has successfully traded precious metals options using Ray Merriman's methods, so I see a very practical application for the material being taught here, and consider this a unique opportunity for serious students to develop the skills needed for market timing and analysis." - J.N., trader, Boulder, CO

"I felt all aspects of the class were excellent. Everything was presented in a clear and logical way. I wish I could think of something to suggest as an improvement but I really cannot come up with anything. The information was presented very well. One last thought is that I was happy to find out that MMA is made up of good hearted people. This encourages me to want to keep learning and utilizing the services that you provide." - H. M., Port Townsend, WA

For more information on the Merriman Market Timing Academy (MMTA), please see pages 6-9 in this catalog.

The cost for this DVD is \$395.00 plus postage. It includes 8 DVD's plus the course workbook.

SEEK-IT BOOKS

These and other books are available on our website at www.mmacycles.com

The Universal Clock

The only book that clearly relates prices of financial markets to planetary positions, using W.D. Gann concepts. Chapters include: Price Repetition Patterns, The Universal Clock, Planets in Action, The Divisions of the Universal Clock, and Wheels Within Wheels.

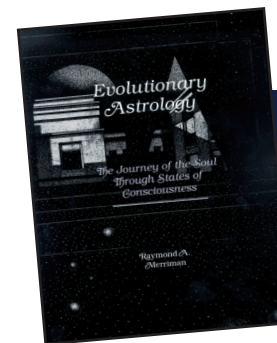

by Jeanne Long, - Approx. 140 pp., spiral bound, gloss cover, - \$144.00

Basic Astrotech

The basic book on relating Gann's time and price symmetry to planetary movements. Very clearly written and easy to understand, with several graphs to illustrate the concepts.

by Jeanne Long - Approx. 78 pp., spiral bound, gloss softcover, - \$50.00

Evolutionary Astrology: The Journey of the Soul Through States of Consciousness

by Raymond A. Merriman

A beautifully written book on the evolution of individual consciousness as seen through astrological principles. The reader is taken on an incredible journey that starts with the natal angles, moves into a profound and insightful discussion of transits of the North Node and Saturn over these angles and angular midpoints. It then culminates with an integration of the individual chart with major astrological patterns influencing the world community.

"Ray Merriman has written a book that truly lives up to its subtitle - it does describe the journey of the soul through states of consciousness. It takes the reader on a journey... that will open their eyes to a deeper understanding of themselves as well as of astrology."

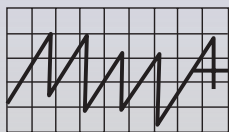

Marion March, Aspects Magazine.

"Every time I read Evolutionary Astrology, I can't help but wonder if you still see the magic in this book. You are amazing! Thank you for sharing."

Celeste O.

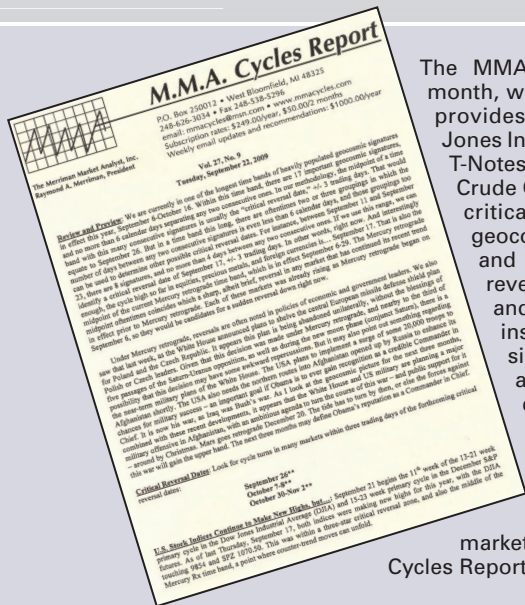

Approx. 258 pp. 8 1/2" x 11", perfect bind, \$25.00 - case bound limited edition with prints, \$75.00

MMA REPORTS

M.M.A. Cycles Report

MMA's MOST POPULAR MARKET REPORT!

The MMA Cycles Report is issued every month, with occasional special updates and provides in-depth analysis of the Dow Jones Industrial Average, S&P, Gold, Silver, T-Notes, Euro, Swiss Franc, Soybeans and Crude Oil. It includes a list of forthcoming critical reversal dates, based on geocosmic studies. There is also a new and special section short-term lunar reversal dates for U.S. stock indices and COMEX Silver. Used by financial institutions, investors, and traders since 1981, the MMA Cycles Report also comes with 8-12 additional charts, at no extra cost.

If you appreciate accuracy in market timing, and insight into the short and intermediate-term strategies and outlooks of these markets, then you cannot beat the MMA Cycles Report.

"I have followed the work of Ray's for several decades. He is the only analyst that I know who properly uses cycles as having highs and lows in probable time bands. His 4 year cycle (extremely dominant) interpretation is excellent! He is the only analyst that I know of that recognizes the importance of the 36 and 72 year cycles and he seems to have them positioned accurately. The critical reversal dates/zones he gives almost always occur right on cycle highs and lows"

- Jay Kettlehut, Cycles and Patterns Research, Ann Arbor, Michigan

"For too long I accepted the notion that "understanding" money was impossible for an artist. After a year of reading the Cycles Report and asking questions of Ray, I've learned otherwise. Creativity is an asset when it comes to understanding the markets."

- Claudia Chapman, Graphic Design and Editorial Services, Southbury Connecticut

"Watching time and price coming into your three star reversals is an amazing thing to watch unfold. I should of signed on years ago."

-J.C. Canton, MA

Many thanks, Ray !!! you are ...indispensable !!!

- Bruno C., Trader, Barcelona, Spain"

The cost of this report is \$325.00/yr, \$125.00/4 months, or \$66.00/2 months, with automatic renewal options available. A 2-issue trial subscription is available, one time only, for \$55.00.

NEW!!! M.M.A. EUROPEAN STOCK MARKET CYCLES REPORT!!!

A 3-4 page report issued monthly one day after MMA Cycles Report. Detailed cyclical and technical analysis of The German DAX, Swiss SMI, and Netherlands AEX indices. The introductory special rate for this report is \$195.00/yr or \$95.00/4 months. A 2-issue trial subscription is available one-time only for \$40.00.
