February 27-28, 2009, Varna, Bulgaria
Addar 1-3

Dear colleagues, astrologers, scholars, students and lovers of the Sky.

Today, the 27th of February, 2009, being the first day of the new month Adar, the Moon was high into the sky, brilliant and beautiful like a Venetian gondola, appearing almost at the same time with Venus. Ishtar was high above the Moon and only six days away of her elongation.

With the previous month Shabat having 30 days, the Moon has perfected its cycle.

Also, Jupiter appeared six days ago and Saturn is making his Acronychal Rise after four days.

Under such brilliant auspices I am exalted to announce the descent into our world of:

PORPHYRIUS MAGUS

ΠΟΡΦΥΡΙΟΣ ΜΑΓΟΣ

AD 233-301

Known widely as a philosopher, Porphyry was
a visionary, a seer,
an initiate of highest degree, an astrologer and a mystic
constantly striving for the Ultimate Revelation

PORPHYRIUS MAGUS

coming in the new version of PLACIDUS-

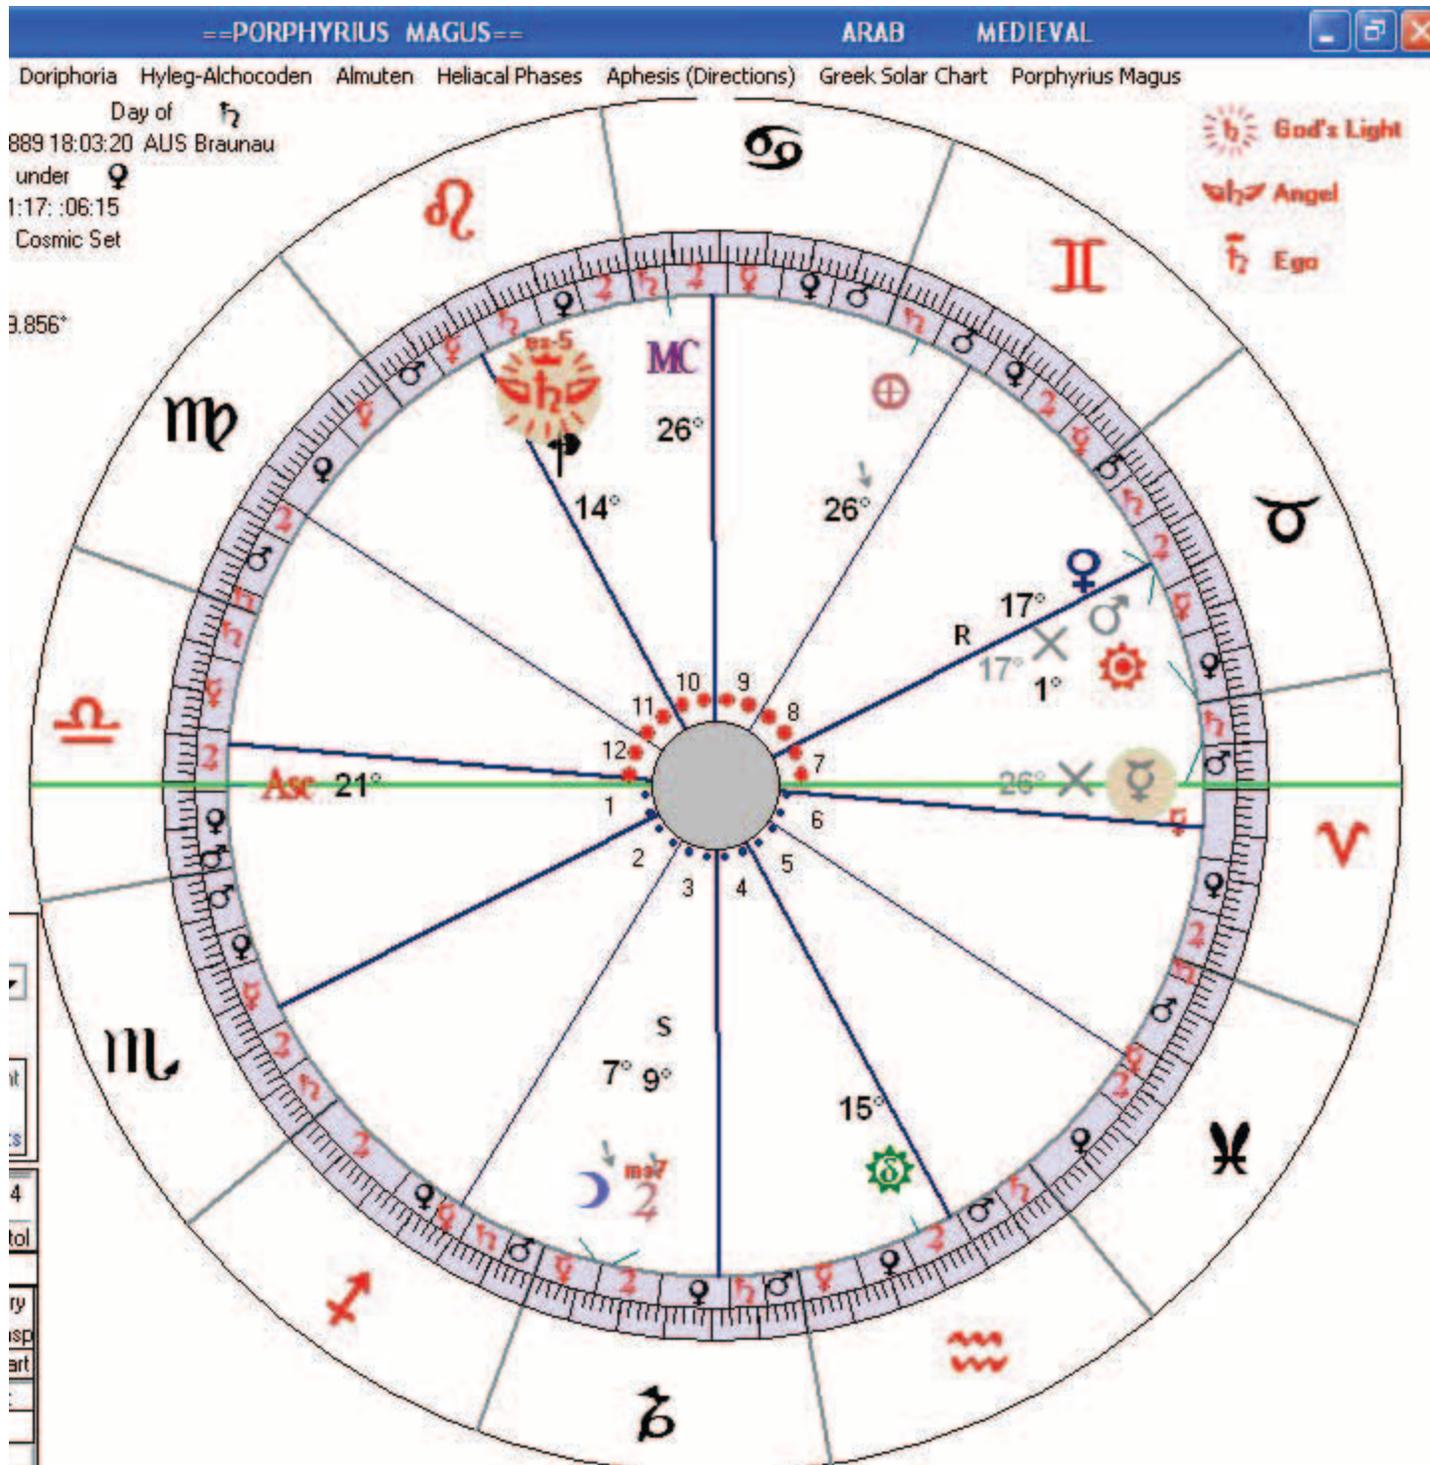

THE MOST POWERFUL WEAPON

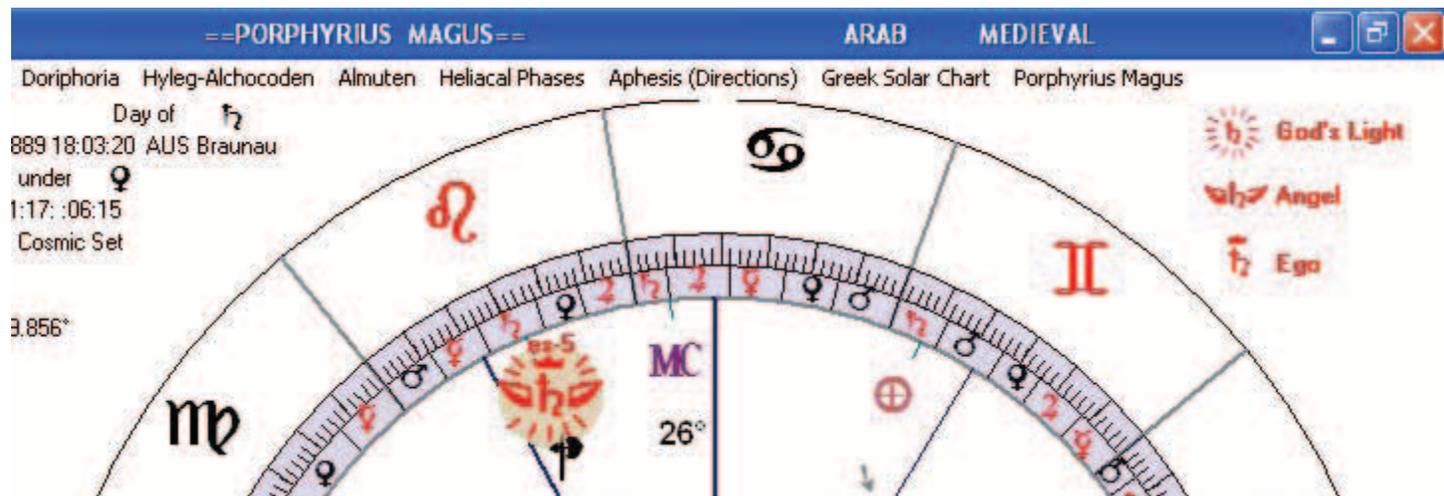

for

**HELLENISTIC, ARAB and MEDIEVAL
ASTROLOGY**

PORPHYRIUS MAGUS
enables us to see through his eyes
the true essence of the people
by the Magic of the True Ancient Astrology.

The chart below is that of Adolf Hitler as seen by the Porphyrius Magus module of
PLACIDUS 6.00

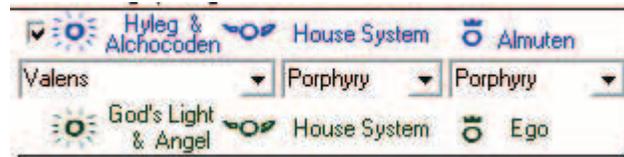

Here we can see immediately on the chart and with symbols the astral trinity of every person- a very important and meaningful doctrine within Hellenistic and Arab Astrology:

The God's Light- the Hyleg (Epikratetor)

The Guardian Angel- the Alcocoden (Oikodespotes) and

The Ego- the Almuten (Kurios).

We can set these to be computed by 6 Hellenistic, 3 Arab and 1 Medieval authors. We choose the authors with a click of the mouse over a roll-down list:

HYLEG-ALCOCODEN List

With a mouse-click, we choose an author and PORPHYRIUS MAGUS immediately computes and refreshes the chart on the screen according to the new choice of doctrine.

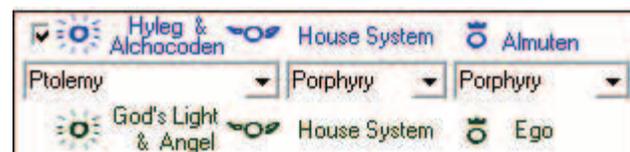

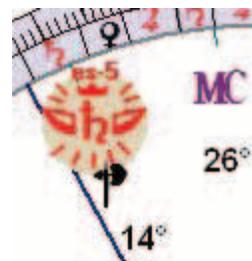

The Hyleg appears with an aura of Light- symbol of the Life coming from God.

The Alcocoden- the Guarding Angel is with wings.

The Almuten- the Ego is with crown.

If one and the same planet (star) turns out to be all of the above or two of them, this star appears carrying all its insignia.

As in the case of Hitler, Saturn is all three.

Here the Hyleg and Alcocoden are computed according to Ptolemy and the Almuten by Porphyry. This is shown by the choices of the authors.

We can see immediately on the screen many arcana of the True Ancient Astrology. In this case, we notice a black battle-axe by the side of Saturn.

This symbol shows the 'Contra-Doriphoria' (Δορυφορια παρ αιρεσιν-Porphyry-Antiochus) or Doriphoria either from the opposite sect or on the 'wrong' side of the Light of the Time (in this diurnal birth the Light of the Time is the Sun and Saturn should be oriental in order to be 'real' and 'true' doriphoria of the Sun)

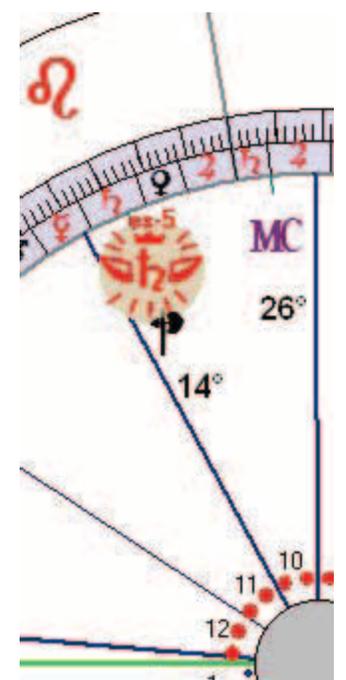

Above the crown of Saturn (symbol of the Almuten), we see the text 'es-5'. This indicates another extremely important factor in the Hellenistic Astrology- the Heliacal Phases.

'es-5' stands for 'evening stationary 5 days before birth' (the minus sign shows that the phase has taken place before birth)

The diurnal planets (Sun, Saturn and Jupiter) are everywhere in Porphyrius Magus in Red. The nocturnal Moon, Mars and Venus are Blue. The same for the signs.

The hemisphere where the Sun is (above or below horizon) is also designated with an arc of red dots in a half-circle. Blue-circles half-encircle the other side from the horizon. In this way we can see immediately the degree of days of all planets.

On the right we can see Saturn in red (diurnal planet) in red Leo (diurnal sign) and in the red-encircled side of the horizon (where the Sun is) and above horizon. This tells us that Saturn has the highest degree of the days- the third degree.

The bounds- so important in the Ancient Art, are shown in the inner-most wheel. The rulers of the bounds are shown in the bound they rule. Here we can see that Saturn is in his own bounds.

The choice of bounds is also a click away: Bounds: Egypt Chaldea Ptol

We can switch to Egyptian, Chaldean and Ptolemaic bounds.

There is one more thing about Saturn. He is in a rosy sphere. This tells us that Saturn is in a 'hays' of third degree: day (diurnal) planet in day-time birth, in day sign and above horizon- a most powerful position indeed.

From all of the above, we can judge and -more important- see, the monstrous strength and import of Saturn in Hitler. The black axe of the 'contra-doriphoria' shows, however, the risk that this immense power can go the wrong way...

This program is for the serious researcher who wants to go deep into the Hellenistic and Arab Astrology.

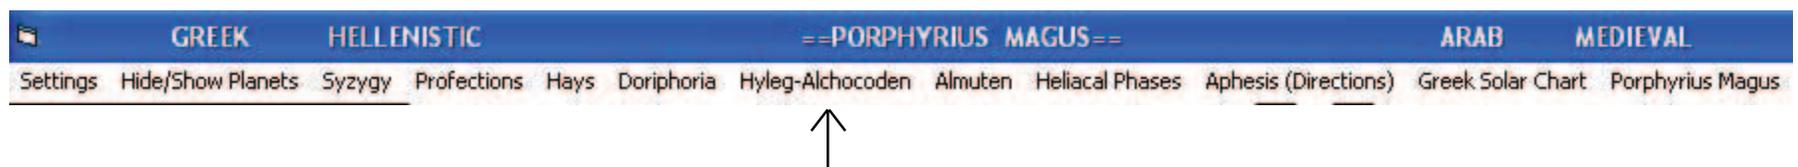

PORPHYRIUS MAGUS shows not only the results of his calculations, but also all intermediate stages.

PORPHYRIUS MAGUS shows his very process of 'thinking' and 'considerations'- step by step. We can see his thought flowing before us.

In this way we can invoke PORPHYRIUS MAGUS as a teacher and learn under his guidance the Art of the True Ancient Astrology.

Because we see his thought we can also control him and check the correctness of his results. How is this achieved?

By creating special modules- something like a window in the brain of the program- through which we can see in details and step by step how Porphyrius Magus recreates the thought-process of all different Hellenistic and Arab authors for choosing a hyleg and alcocoden (as well as for other things as we will see later)

From the main menu, clicking on 'Hyleg-Alchocoden' will roll down a list with all Hellenistic and Arab authors we mentioned.

We can click on an author and call the special glass-window opening into the brain of the program. A panel pops up which shows us in details and step by step the process of the author for choosing a hyleg and alcocoden.

In the picture on the next page Porphyrius Magus show us the thought of Ptolemy.

STAGE 1

We can see that from the planets there are 3 that have 3 or more ruling powers in the 3 'day' places- (Sun, Asc and the Syzygy-conjunction). Saturn, Jupiter and Venus.

From these 3, Saturn is, without question, the Ruler of the Sect of the Birth, that is the Day-Sect (Ο της αιρεσεως Οικοδεσποτης)

STAGE 2

The next is to consider the house positions of the luminaries and of these planets who jump over the barrier of 3 dignities in the three day-centers. Only the Sun, Saturn and Venus continue.

Here is used the Porphyry house system with 5 degree cusps-offset.

STAGE 3

Ptolemy says that the planet, candidate-hyleg, must be strong also in the other sect (the nocturnal sect in this case). In the 3 centers of the Night- Moon, PoF and Syzygy-opposition- the candidate hyleg should gather at least 2 rulerships. Venus and Saturn jump over again.

STAGE 4

Here the invisible (combusta) planets are disqualified. Venus and Saturn are visible.

STAGE 5

Here are shown the candidate-hylegs who have made it so far.

STAGE 6

Ptolemy says that a planet should be in more powerful position, by house and zodiac, to be preferred over a luminary.

Being in the 10th house- the most powerful (acc. to Ptolemy) house- makes Saturn inevitably the Hyleg- the star from where the soul of Hitler has come to this world.

(Stage 7 is if there is no clear winner in Stage 6)

We can also modify the thought process of Ptolemy, by changing the bounds system, the house system, Arab or Ptolemaic Pars Fortunae and the almuten system by which to choose Who rules the Hyleg id est Who is the Alcocoden.

If we change the house-system to Sign-House system then a different picture emerges:

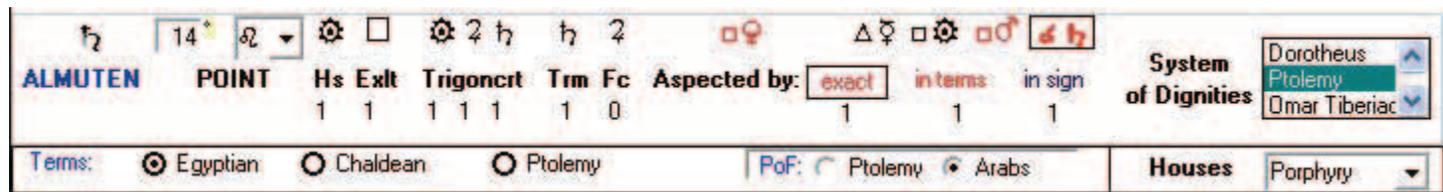

house	Almuten of the Day	Candidate in 10.1.11.7.9	visible	Candidate HYLEG	Power of house position	Own Sect	HYLEG
8	2	X	3				
4	5	X	2				
LORDS of ASC # of dignities: must be >= 1		LORDS of ASC # of dignities: must be >= 2					
11	6	11	7		3		
4	6	X	4				
8	3	X	4				
8	6	X	2				
7	3	7	6				
9		9					

Here Saturn is the clear winner from the very beginning as he alone is in a house proper for a Hyleg to be.

After Porphyrius Magus found the Hyleg- the Life-Source of Hitler- according to Ptolemy, now he is leading us to the Guarding Angel of Hitler (the planet with dignities in the place of the Hyleg that is the Alcocoden)

Here we can see that in the almuten-system of Ptolemy, Saturn and the Sun are the possible alcocodens of the hyleg- Saturn.

Both have 2 ruling powers in 14 Leo

In the end, Saturn is chosen because he is the Hyleg and because of his more powerful position in house and zodiacally.

In this way, now Saturn claims the wings of the Guarding Angel- the celestial being who took the soul of Hitler from the Hyleg (Saturn) [himself] and brought it to Earth in the time of the conception.

This Guarding Angel is the Angel who watched over Hitler during his life and who after his death took him back to the Hyleg again (Saturn)

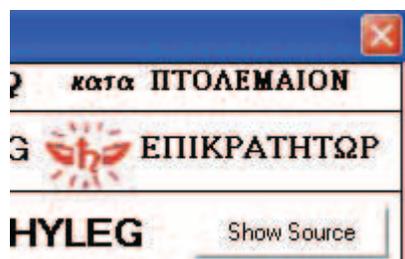

ALCHOCODEN

ΟΙΚΟΔΕΣΠΟΤΗΣ

The Guardian Angel gives Hitler his time of Life on Earth-his years of life. Saturn in an angle, according to the Astrological Tradition, gives 57 years. Hitler lived 56.

In the end, we can check the basis of everything computed by clicking on the button 'Show Source' in the right upper corner.

We will see the original text in Greek concerning Hyleg and alcocoden-the topic of the module in question.

This is available for all different modules and different topics of the program. Original sources in Greek and Latin come up for the last and ultimate deliberation and consideration of the astrologer.

PAGES 272-278 ROBBINS EDITION of PTOLEMY

We can order the Wizard to consider the planets in many different ways.

There are astrologers, serious researchers into Hellenistic Astrology, who believe that Porphyry used only the sign rulers of the ASC, Moon, MC and PoF and the planets-rulers were important proportionally to their position in the order given. (the ruler of the sign of the ASC is the most important, then the ruler of the sign of the Moon and so on...)

In the system of these researchers also, the heliacal phases are considered also 7 days after birth

The Wizard can imitate all this through our changing of the points assigned.

Here is imitation of the system of these astrologers-scholars.

The screenshot shows the 'ALMUTEN WIZARD of PORPHYRY' interface. At the top, it displays the subject 'Adolf Hitler', birth date 'Saturday Apr 20 1889 18:03:20', day of the week '♃', and hour '12 under ♀'. The title is 'DAY BIRTH' and 'κατα ΠΟΡΦΥΡΙΟΝ'. The main section is titled 'ALMUTEN WIZARD of PORPHYRY' and 'Lords of'. It lists candidates for Almuten based on heliacal phases within 7 days before and after birth. The candidates are: 8♃ 1°♈, 4♃ 7°♈, 7♀ 26°♋, 8♀ 17°♈, 8♂ 17°♈, 4♃ 9°♈, and 11♄ 14°♈. The 'Lords of' section lists planets with their bounds and signs: 21♃ ASC ♈, 7♃ ♈, 26♃ MC ♈, 26♃ ♈, and 27♃ ♈. The 'CANDIDATE ALMUTENS' section shows the total points for each planet: 0 for ♈, 3 for ♃, 2 for ♀, 6 for ♁, 0 for ♄, 1 for ♃, and 5 for ♄. The 'TOTAL points' section shows the points after various adjustments: 0 for ♈, 3 for ♃, 0 for ♀, 6 for ♁, 0 for ♄, 1 for ♃, and 5 for ♄. The 'CANDIDATE ALMUTENS' section shows the final results: 0 for ♈, 0 for ♃, 0 for ♀, 12 for ♁, 0 for ♄, 0 for ♃, and 14 for ♄. Saturn (♄) is crowned as the Ego (King of his psyche).

Here we assigned points 5,4,3,2 and 1 to the sign-rulers of the ASC, Moon, MC, Pof and the bounds-ruler of the syzygy (the text is explicit on this). One point is assigned also to the heliacally active planets within +/-7 days from the Birth.

We can see here that Venus gathers 6 points and Saturn gathers 5 in the first round.

In the second round though Saturn is again crowned as the Ego of Hitler, the King of his psyche.

[the mentioned researchers though would take most probably Venus as the final Kurios-Almuten because in their system they give less import to the second round of consideration in the system of Porphyry and prefer to concentrate on the first.]

For detailed treatment of the Kurios System of Porphyry and translation of his relevant chapter, expect my 'Greek and Arab Astrology' Part II volume coming as volume 3 of my research series PDHA, Primary Directions and History of Astrology

'Greek and Arab Astrology' Part I volume which came out in the end of 2008 examines mainly Dorotheus and Ptolemy.

From Porphyry's Introduction to Ptolemy

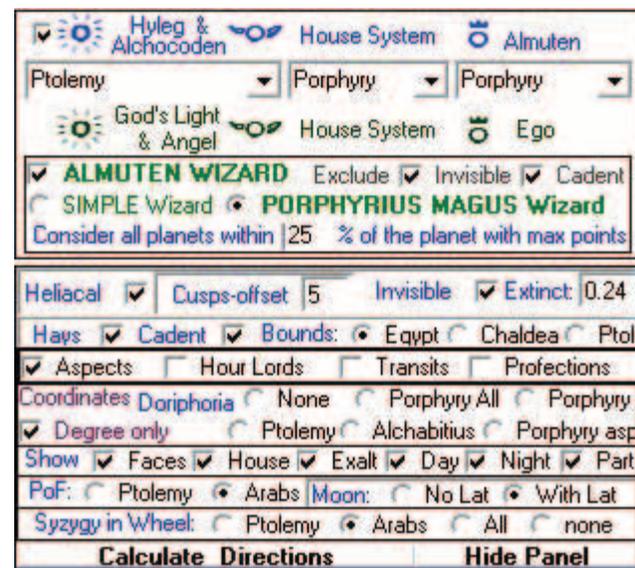

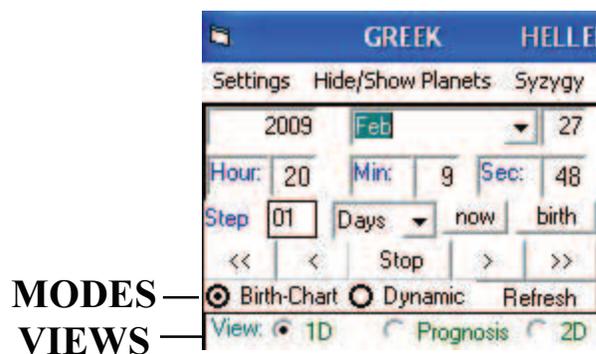

Now I will go shortly over the capabilities of PORPHYRIUS MAGUS.

The main Menu.

Here is the main control panel from which we control the 2 different MODES and the 3 different VIEWS of PORPHYRIUS MAGUS

Here is the control panel for the screen.

PORPHYRIUS MAGUS in his Birth-Chart MODE 1-Dimensional VIEW

This is the circular chart we all know (1-Dimensional VIEW) for the Birth-Time (Birth-Time MODE) We used this Mode and View for our examination so far of the chart of Hitler.

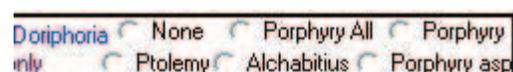

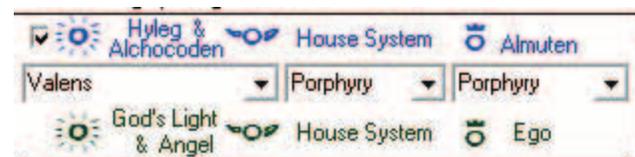

In his Birth-Chart - 1D combination PORPHYRIUS MAGUS computes:

the Hyleg-Alcocoden systems according to 6 Greek, 3 Arab and 1 Medieval author.

The Almuten systems are computed acc. to 3 hellenistic authors, 3 Arabs and 1 Medieval.

Doriphoria acc. to Ptolemy, Porphyry-Antiochus and Alchabitius

Calculates all Porphyry doryphoria: real Solar and Lunar Doriphoria, the Contra-Doriphoria and the double-Contra Doriphoria. There are again special panels for the doriphoria similar to those for the hyleg-alcocoden and almuten determination.

PORPHYRIUS MAGUS in his Birth-Chart MODE 2-Dimensional VIEW

This is a special projection of the Celestial Sphere for the moment of the Birth in 2 dimensions.

The center of the projections is the center of the ecliptic.

We can control how much of the sphere is projected (through the 'Ecliptic Breadth' textBox)

Ecliptic Breadth

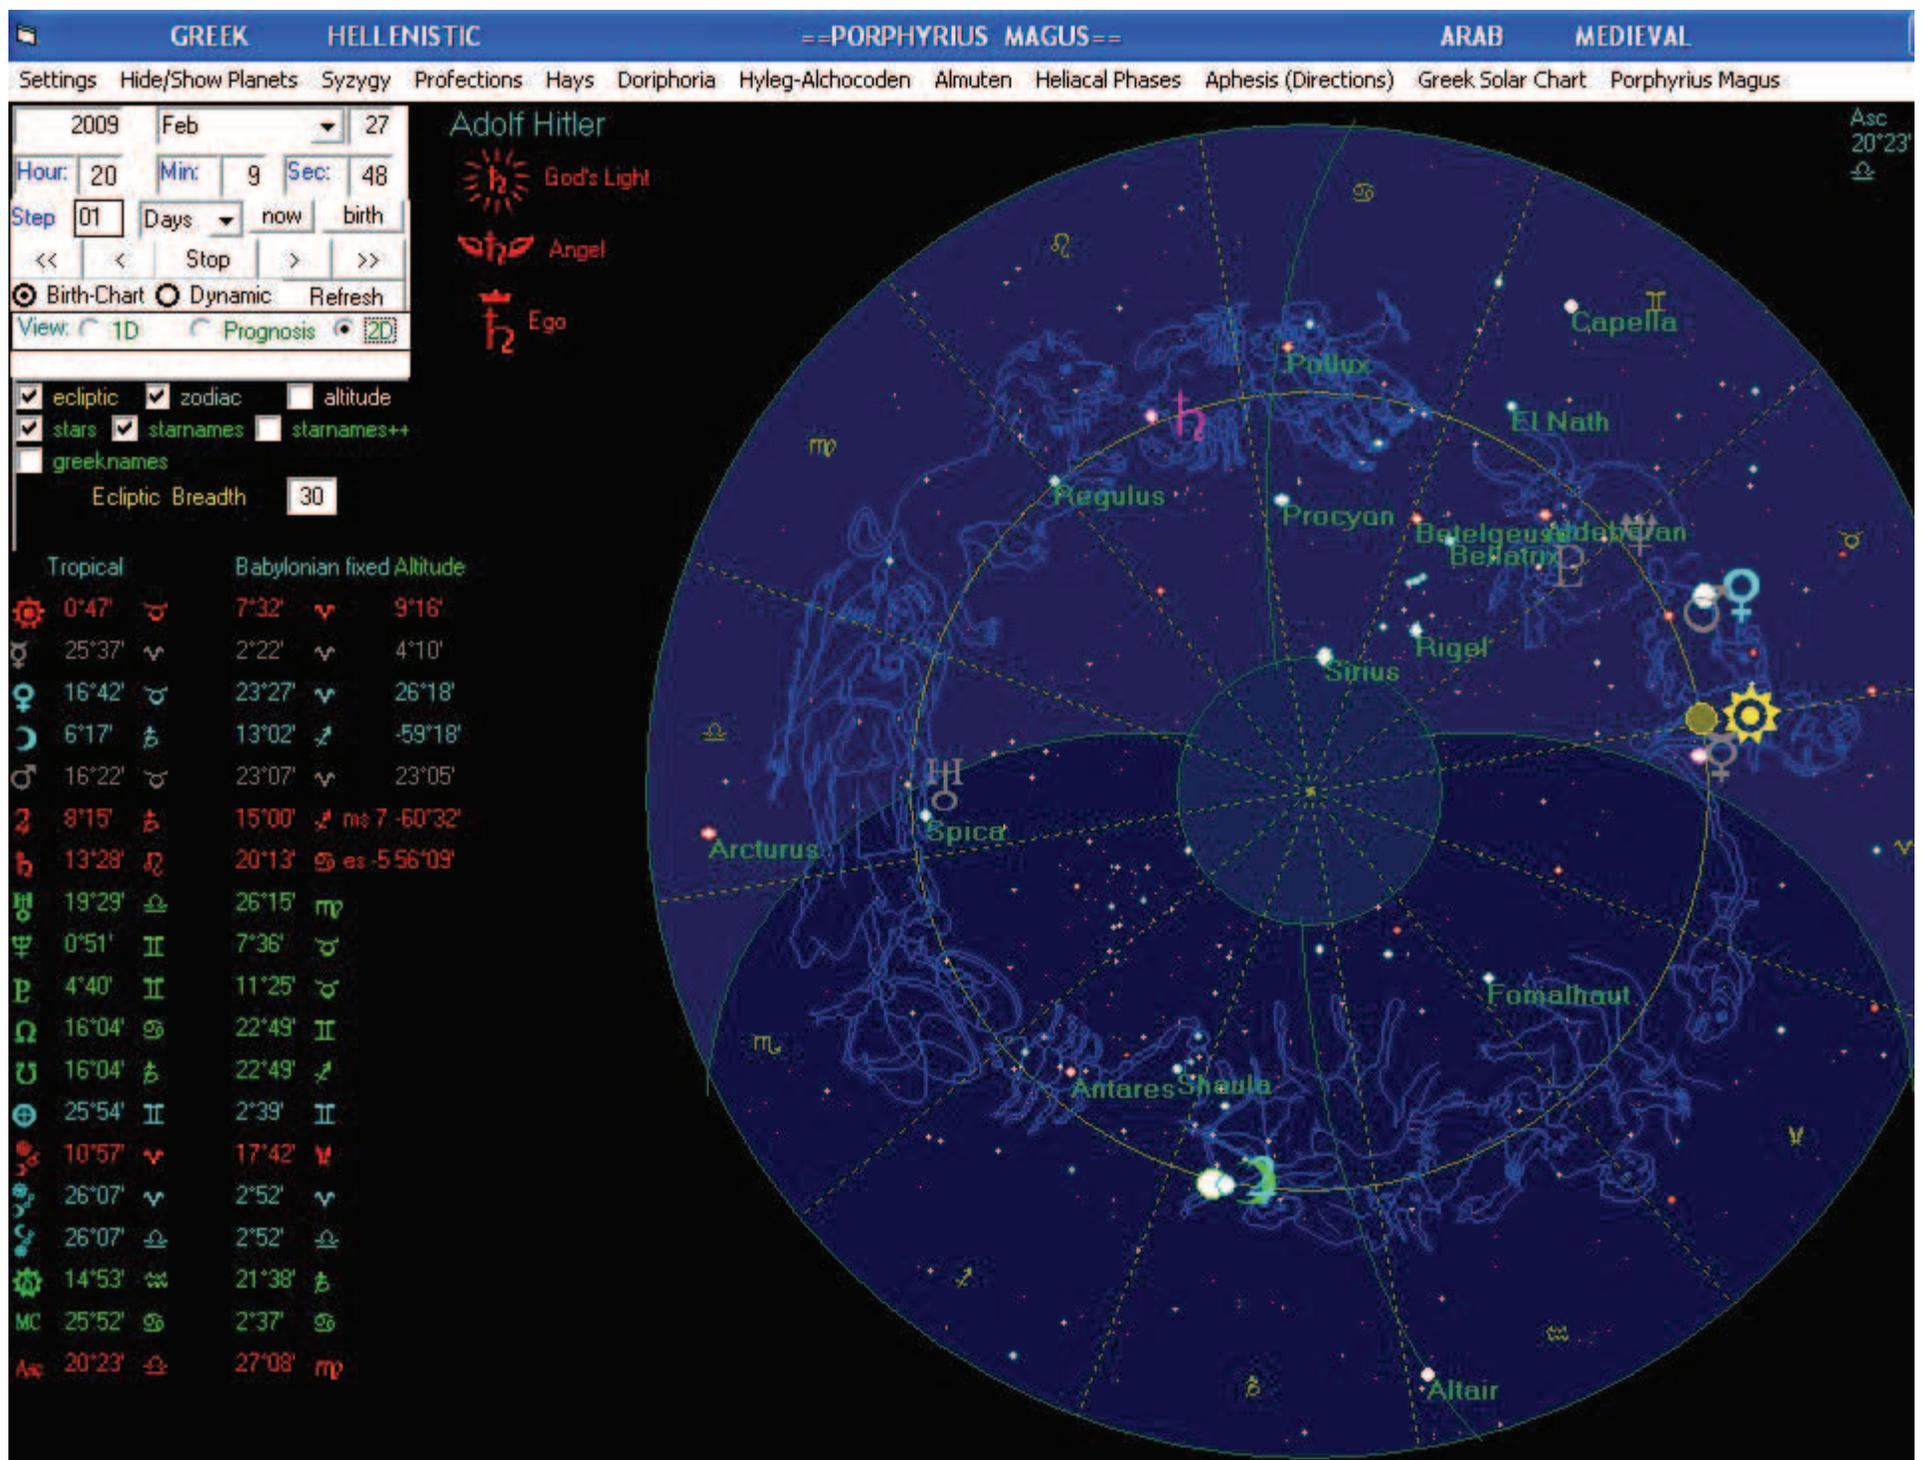

We can project only a small band of 30 degrees north and south of the ecliptic OR we can project the whole sphere.

The planets and other important points are given in their Tropical and Babylonian fixed (29 Virgo = Spica) zodiac.

Also the altitude of the planets is given and a short message for planets making heliacal phases +/-7 days within the Birth.

The invisible planets are shown in grey.

There are options for the stars, the star names and the zodiac.

PORPHYRIUS MAGUS in his Birth-Chart MODE Prognosis VIEW

This is the Natal Chart inside
(We can see in the inner wheel everything we can see in the 1D VIEW)

The Primary Directed Hylegial Points are outside of the wheels.
The Hylegial Points are directed as lege artis per Ptolemy and the Arab and Medieval Astrology.
We can see immediately where are the hylegial points by Bounds and Degree and Minute.

On the Left we can see the 4 Lords of the Time used by the Arab and Medieval astrologers
for all seven Hylegial Points
(ASC, Sun, Moon, PoF, MC, Part of Spirit and the Syzygy)

This is valid for the time shown in the main control panel in the left upper corner.
We can move for- and back-wards with a chosen step and in animation and watch how the chart becomes alive.
The aspects of the radical planets are on the outer wheel .
So we can see when a primary directed hylegial point goes over aspects.

PORPHYRIUS MAGUS in his DYNAMIC MODE

1D and 2D VIEWS are possible with Dynamic Mode (Prognosis View is not possible)

In the Dynamic Mode we switch to Observatorium.

Any time which we choose to input in the time-controls in the main control panel in the upper left corner, becomes the Time for which PORPHYRIUS MAGUS computes everything- Hyleg, Alcocoden, Almuten, Hays, Doriphoria, Heliacal Phases.. It is exciting to input a step of , lets say, 20 minutes. Then click the repeat-forward button which will keep turning the chart with 20 minutes and watch how the c

It is exciting to input a step of , lets say, 20 minutes. Then click the repeat-forward button which will keep turning the chart automatically .. and watch...

We will see how the Hyleg changes over the day and how the crown of the King goes from planet to planet. We will watch also how the Guardian Angel changes. And everything- planets in Hays, Doriphoria- real and those with black axes, planets in heliacal phases...

Powerful tool for finding a certain moment we want...

Of course here we can change with a mouse-click the authors by which Porphyrius goes in his computations....

We can change any setting while the chart is animated with the repeat-forward.

There is one very important use of this Dynamic Mode. We can first input the Birth-Time in the Dynamic Mode and then slowly turn the timeforward with 1 day. As this means 1 year of life, we can in this way see how the chart changes.

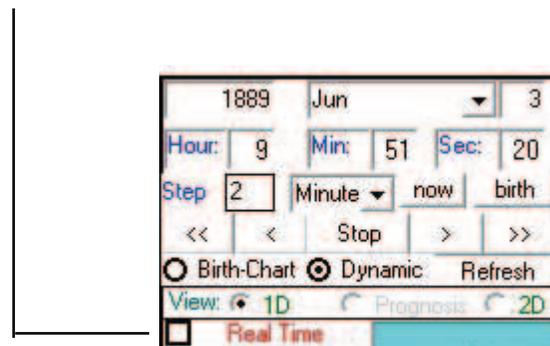

This new chart will be valid for THIS YEAR of the NATIVE'S LIFE as the NUMBER of DAYS after birth it is computed for...

If we set the MODE to Dynamic (while being in the record of Hitler) and then click on the button 'birth', this will show again the chart of birth of Hitler. This time, however, we can forward the chart in time with a chosen step.

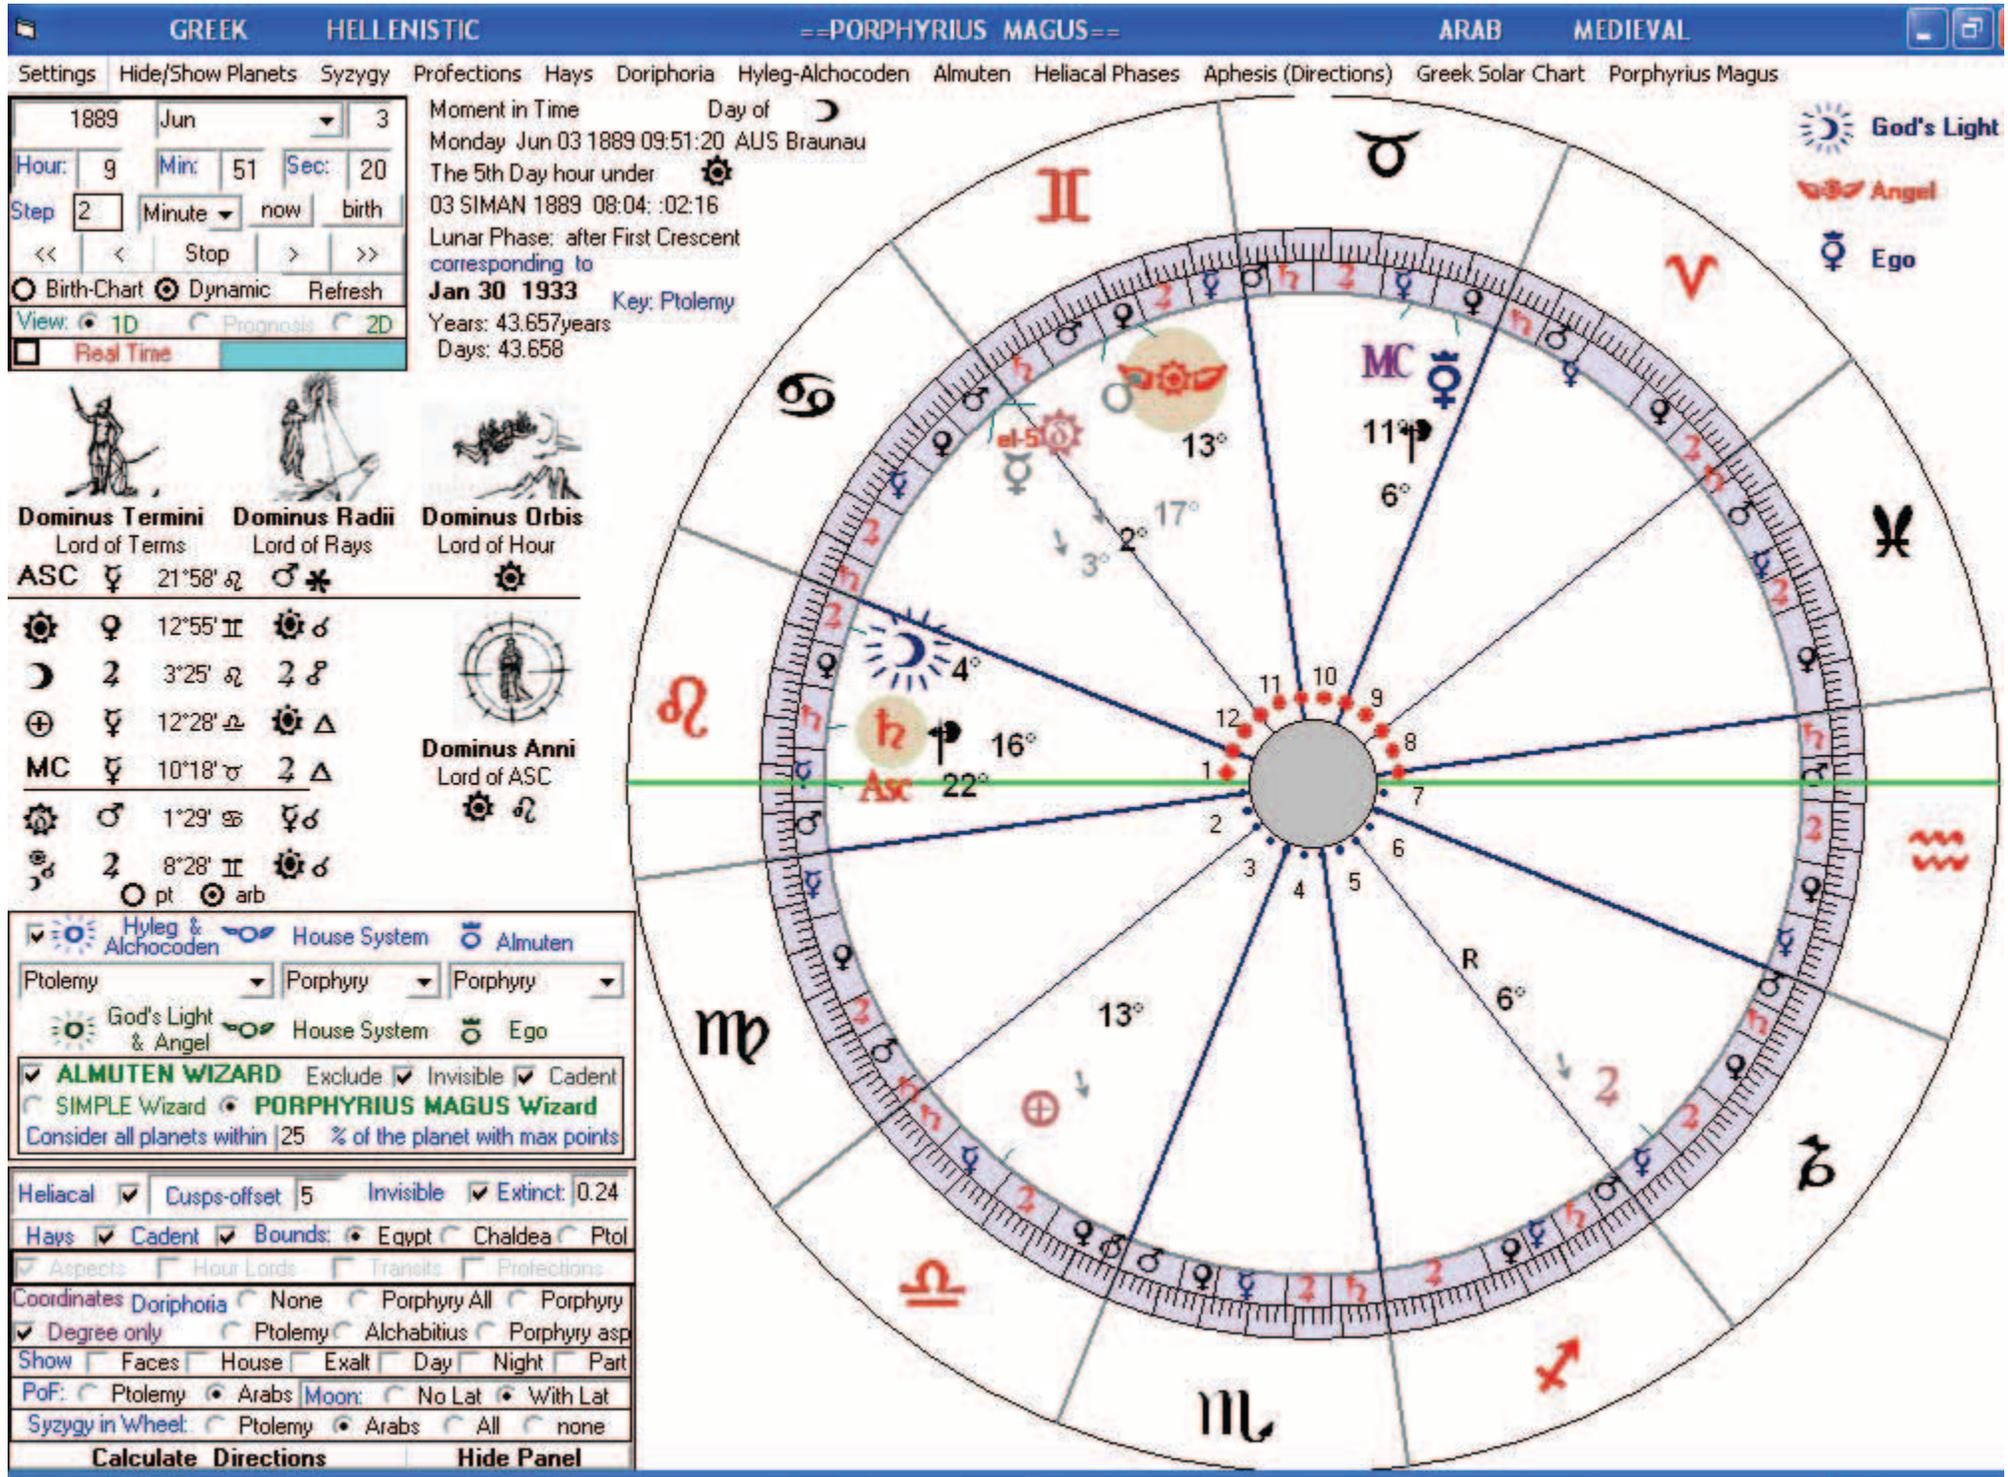

If we forward it with 43 days, this will give us information about his 43rd year of life.

Everything in this chart will be of import: Hyleg, Alcocoden, Almuten, Doriphoria, Invisible planets...

We can also switch the REAL TIME option and Porphyrius Magus will refresh the chart every 5 seconds for the real time.

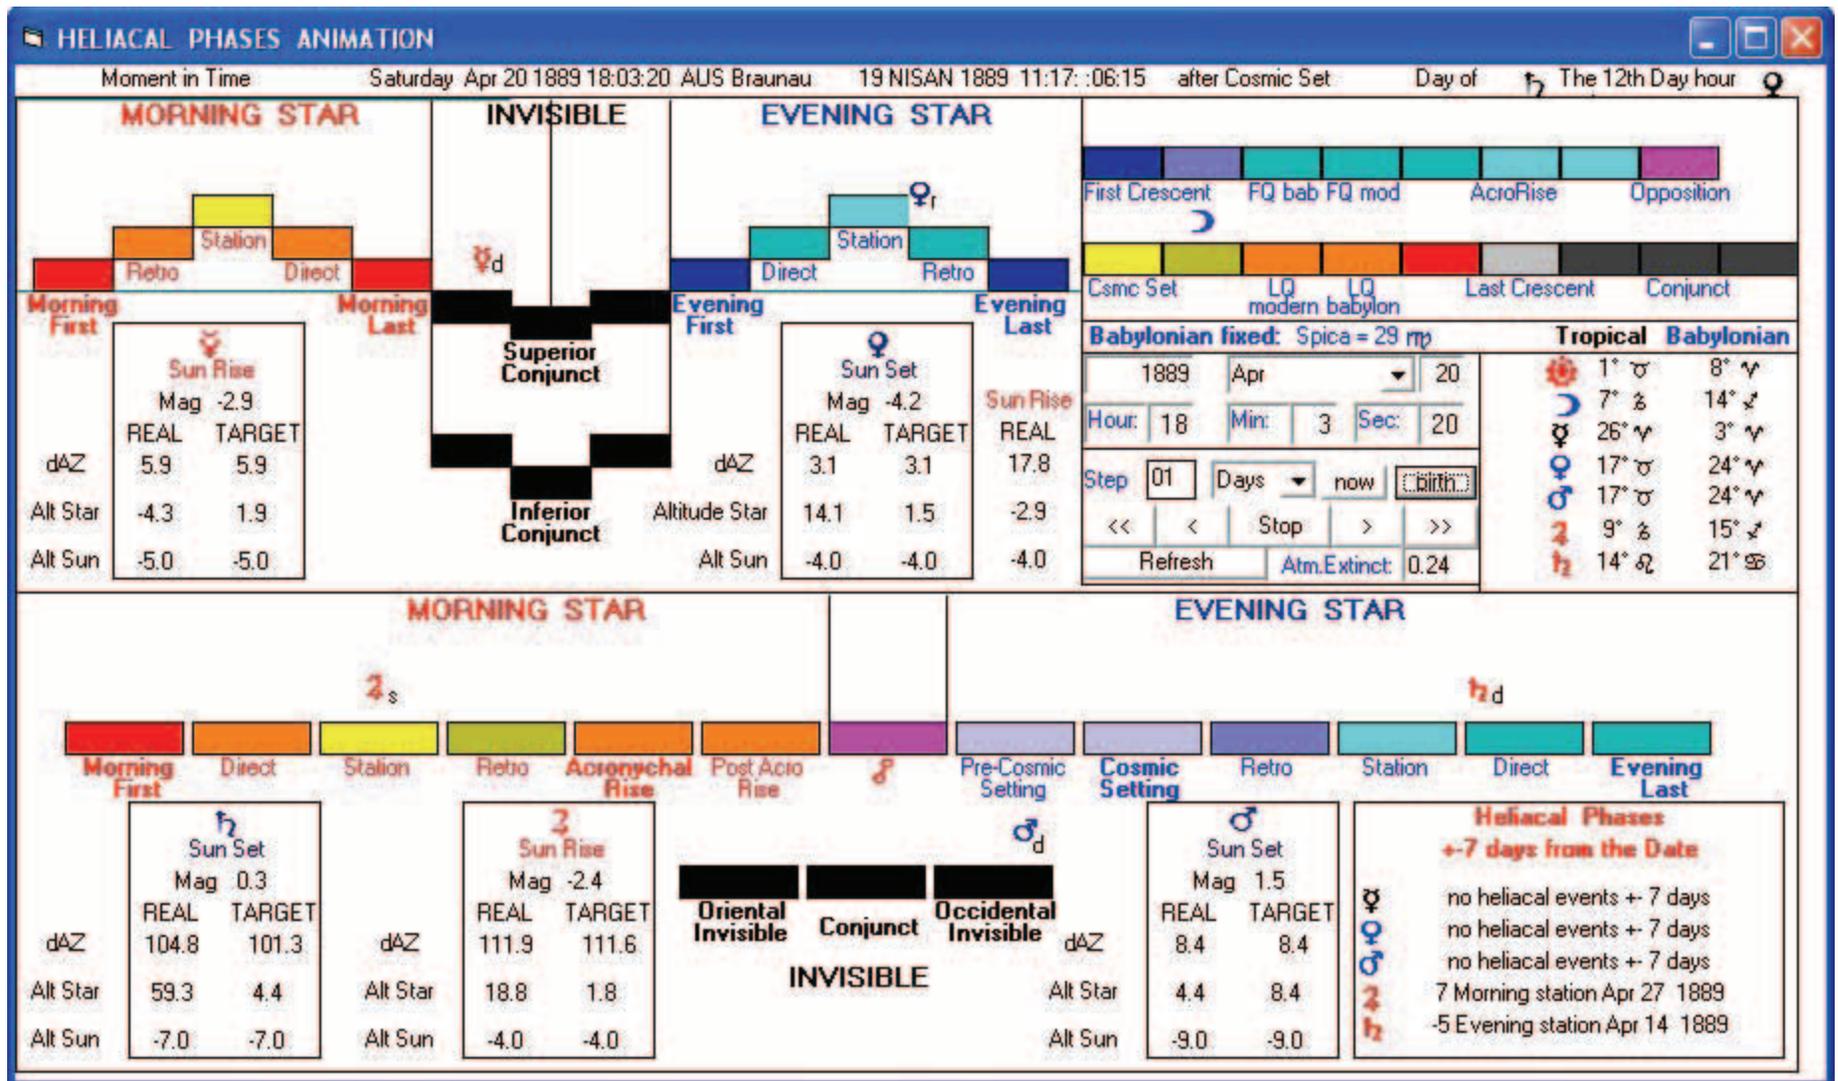

The Chart of Hitler forwarded in the Dynamic MODE with 43.658 days.
 Corresponding Date for Adolf Hitler: 30 JAN 1933. Hitler becomes a Kanzler on this day.

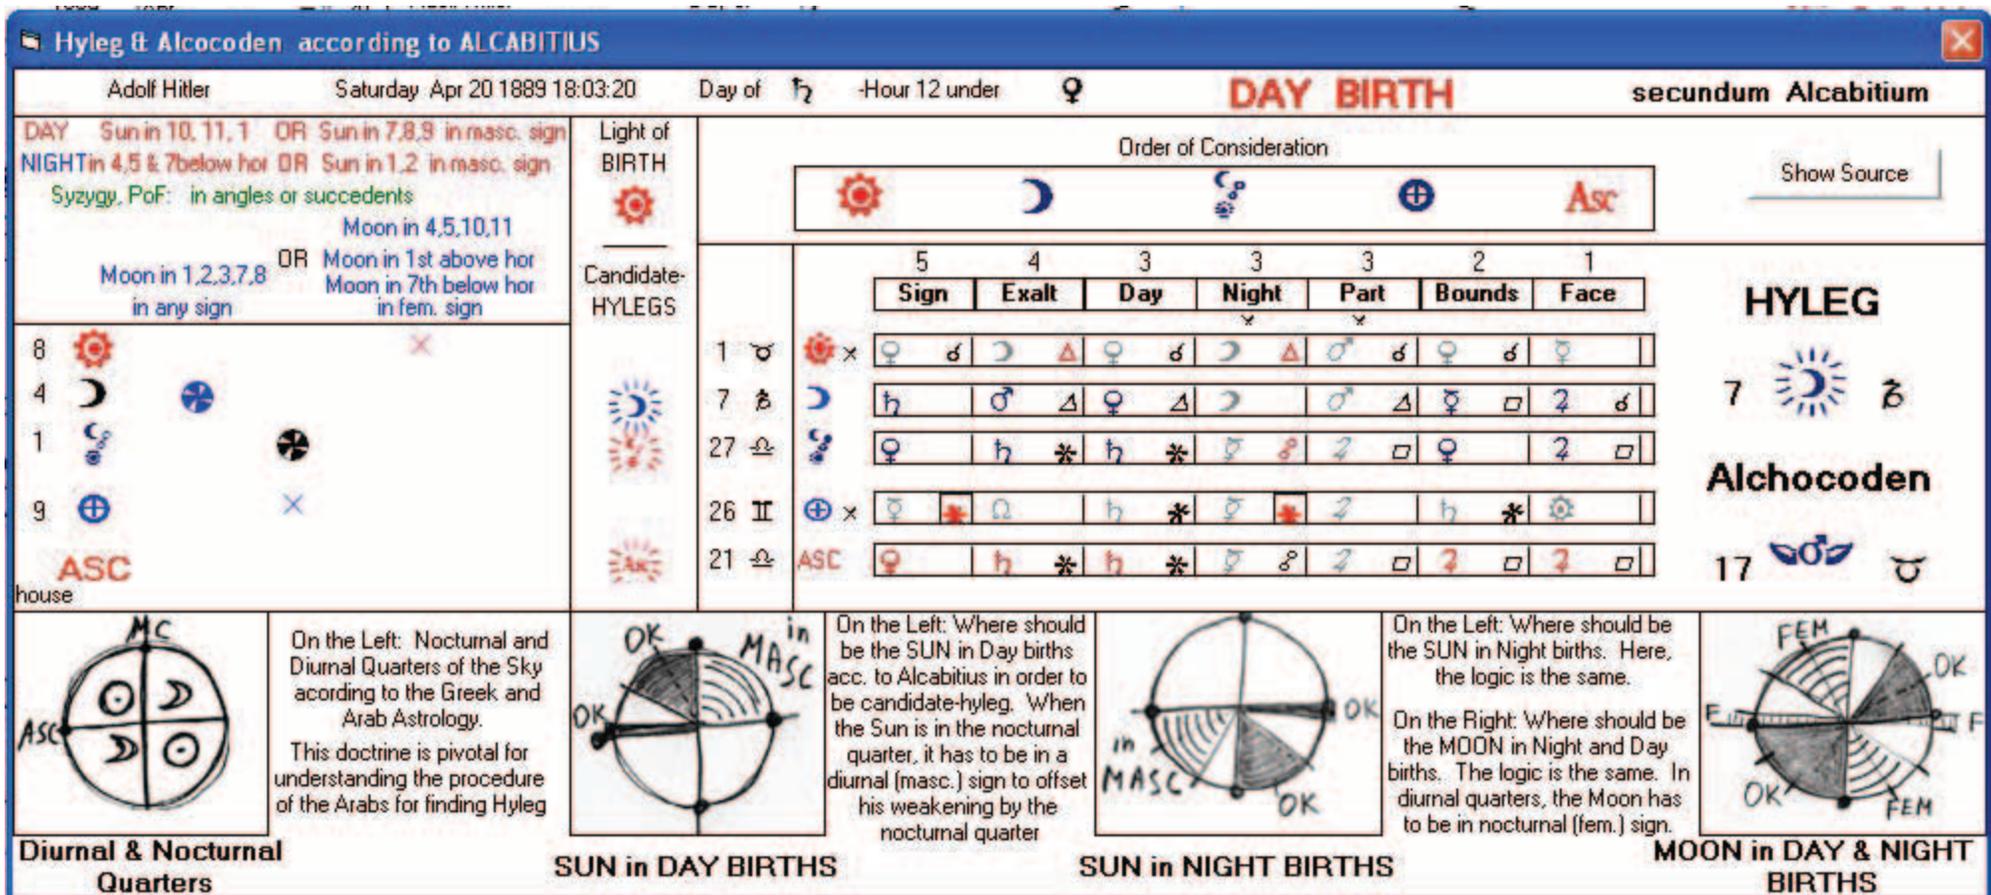

Now I will show some ADDITIONAL screens of PORPHYRIUS MAGUS
